

**CEREBROS™** is Corazon's Neurovascular Information System, the **first of its kind** in the industry, designed to help hospitals **save time and save lives** for the large and growing stroke patient population. CEREBROS™ collects and reports data in real time for use in managing and improving stroke care and outcomes. The system is also built to support certification or accreditation through any of the national organizations.

The latest version includes modules for both primary and interventional stroke programs. CEREBROS™ is designed to:

- Ensure Best Practice
- Extract Certification Data
- Standardize Assessments
- Improve Processes
- Monitor Real-Time Data
- Provide Education

### HL-7 Interfacing

CEREBROS™ is capable of interfacing with many hospital systems, including EMR, ADT, labs, radiology, and others based on its HL-7 platform.

### Certification and Registry Reporting

The robust reporting engine in CEREBROS™ allows for real-time data review. **CEREBROS™ is on the American Heart Association list of Standard Uploader Vendors for data interface solutions for Get With The Guidelines - Stroke** and the system includes reports to assist with meeting certification requirements.

CEREBROS™ captures data through the full continuum of care in several phases.

CEREBROS™ was a finalist from nearly 100 cutting-edge technologies in the **Cleveland Clinic Medical Innovation Summit "2016 Challenge"**

Corazon delivers specialized healthcare expertise in the form of **Consulting, Recruitment, Interim Management, Accreditation, and IT Solutions** specifically within the **Cardiovascular, Neuroscience, Spine, and Orthopedic** specialties. **No other firm has this diverse range of offerings within niched clinical specialties.**
