

Maintain Staff Skills & Knowledge with Corazon's Critical Care Education

Course Content:

- A&P
- Diagnostics
- Therapies
- Acute Disorders
- Lab
- Complications
- Assessments
- Diseases

Corazon offers customized **Critical Care Education** based on the **needs of your organization**, to be delivered over five days on-site. In classroom style, **unlimited attendees** learn at your organization without travel time. Session recording is optional for additional staff review.

The courses have all been reviewed by industry experts and are **CEU-ready** for nursing and continuing education. Our team regularly updates the curriculum to reflect the latest industry literature, best practice, and trends to add **real-world relevance** to the course materials.

With over 600 combined years of healthcare experience, the Corazon team has an intimate knowledge of the key elements that make a service line thrive. **A knowledgeable and dedicated staff is among the most necessary components of a best-practice specialty program.** Our experts provide education to your team so they can maintain competency and capability to effectively manage complex critical care patients. Your staff will learn clinical and operational knowledge that can lead to **increased satisfaction and better outcomes.**

Included in the education sessions, each staff member who completes the training will receive a **competency checklist** to document any off-site education or orientation. The Corazon team will also review relevant documentation from your facility and incorporate feedback from key stakeholders.
