

Our client, a 250-bed acute care facility located in western Michigan, partnered with Corazon to identify an experienced Electrophysiologist to function in a medical leadership role.

The facility is part of a 21-hospital hospital health system with an award-winning health plan, 60,000 team members, 11,500 affiliated independent and employed physicians and advanced practice providers.

### **Position Summary:**

The cardiovascular team consists of six interventional cardiologists, three noninvasive cardiologists, two cardiothoracic and vascular surgeons, and nine advanced practice providers including two dedicated pacemaker technicians.

The chosen individual would be proficient in pacemaker and ICD implantation, ablation of all arrhythmias and laser lead extractions.

### **Challenges /Barriers:**

- High turn-over rate with EP providers in past 3 years
- Utilizing locums full-time to accommodate patient needs
- Aging medical staff in cardiovascular services
- Delays in interviewing candidates by Chief, Cardiology due to busy clinical practice
- Rural location

Corazon was able to build a strong relationship with all members within cardiovascular services and medical staff leadership. A strong collaborative effort to fill this key vacancy quickly was essential. Corazon utilized our relationships with candidates and our medical advisors to identify several qualified candidates.

An exceptional Electrophysiologist from Virginia with experience in program re-builds / restructuring was extended an offer and will begin his new position in September 2025.
